Bangalore, IN (Open to Global Remote) | +91 8408032362 | prachi.panditrao@gmail.com | [LinkedIn](#) | [GitHub](#)

Professional Summary

Full Stack Developer with 7+ years of experience in FinTech, specializing in Java, Spring Boot, Angular, and React.js. Proven record in building scalable, secure, and high-performance systems, with deep expertise in microservices, API development, and cloud-native solutions. Strong collaborator skilled in asynchronous communication, writing extensive technical documentation, and translating business needs into technology outcomes. Comfortable overlapping with US EST/PST or European CET working hours. Seeking to contribute to innovative financial products as a Senior Software Engineer in a global remote environment.

Technical Skills

- **Languages:** Java, Python, TypeScript, JavaScript, SQL
- **Backend:** Spring Boot, REST APIs, Microservices, Kafka
- **Frontend:** Angular, React.js, Next.js, HTML5, CSS3
- **Databases:** PostgreSQL, Oracle, Snowflake, MySQL
- **DevOps & Cloud:** Kubernetes, Docker, Azure, CI/CD Pipelines
- **Tools & Platforms:** Git, JIRA, Confluence, Splunk, Power Automate
- **AI & Automation:** Prompt Engineering, Gen AI, Machine Learning, MCP Servers, RAG
- **Other:** Object-Oriented Programming (OOP), Data Structures, Agile/Scrum, Asynchronous Code Reviews

Professional Experience

Mastercard – Senior Software Engineer

June 2025 – Present | Remote

- Designed and developed Next.js-based white-labeled UI for subscription management, enhancing UX and scalability.
- Automated Merchant Guide Maintenance using Python, reducing manual effort by 90%.
- Implemented Merchant Identification using Generative AI models, improving accuracy and turnaround time.
- Built custom MCP servers leveraging Gen AI for automated code reviews, improving review cycle efficiency by 40%.

- Conducted GitHub Copilot enablement session for 1000+ Mastercard employees, promoting AI-assisted development across teams.

Mastercard – Software Development Engineer II

July 2022 – May 2025 | Pune, IN

- Re-engineered legacy script workflows into RESTful APIs, cutting onboarding time to under 1 minute and improving delivery speed by 75%.
- Automated privacy request workflows using Power Automate and microservices, handling 500K+ monthly requests without manual intervention.
- Contributed to architecture design and performance optimization, ensuring high system availability and data security compliance.
- Collaborated with cross-functional teams across architecture, product, and business operations for seamless deployments.

HSBC Technology India – Senior Software Engineer

June 2021 – June 2022 | Pune, IN

- Spearheaded migration of customer onboarding platform to Spring Boot, React.js, and Kubernetes, delivering 8+ performant APIs and reducing response times by 80%.
- Recognized for excellence in coding best practices, collaboration, and cross-border team coordination.

HSBC Technology India – Software Engineer

July 2018 – May 2021 | Pune, IN

- Developed Angular UI for Global Internet Banking, implementing GDPR-compliant features with zero downtime.
- Migrated a Spring-JSP app to modern frameworks, reducing development time by 87.5% and expanding functionality across global branches.

Education

Bachelor of Engineering (Computer Science) – University of Pune (June 2014 – June 2018)

Key Projects & Achievements

- Deep Health Check Framework: Implemented proactive monitoring for microservices using Splunk, minimizing downtime.
- Data Protection Onboarding: Optimized DP Law processes, achieving 75% faster delivery through API-first architecture.
- Recognition: Received internal appreciation for analysis excellence and cross-team leadership in design discussions.
